

## White Paper

Cryptocurrency Name: Zero Classic

Ticker: ZERC

Creation date: 2019-03-09

Version: 1.0

### 1. Summary

Zero classic is a cryptocurrency that aims to maintain anonymity by having the ability to make transactions hidden. It is based on blockchain technology and offers a number of advantages over traditional fiat currencies, including:

**Security:** Transactions are secured by cryptography and are transparent and immutable.

**Privacy:** Transactions are not linked to real identities, which helps maintain user privacy and can be hidden via zk-SNARKs technology.

**Decentralization:** The currency is not controlled by a single entity, making it more resistant to censorship and manipulation.

**Ease of use:** Transactions can be made quickly and easily using a digital wallet.

### 2. Problem

The current monetary system faces a number of problems, including:

**Inflation:** The value of fiat currencies tends to decline over time, eroding consumers' purchasing power.

**Centralized control:** Fiat currencies are controlled by governments and central banks, which can make them vulnerable to manipulation and abuse.

**Lack of transparency:** Fiat currency transactions are not always transparent, which can facilitate money laundering and other illegal activities.

### 3. Solution

Zero Classic offers a solution to the problems of the current monetary system by offering a digital currency that is:

**Secure:** Transactions are secured by cryptography and are transparent or hidden and immutable.

**Private:** Transactions are not linked to real identities, which helps maintain user privacy.

**Decentralized:** The currency is not controlled by a single entity, making it more resistant to censorship and manipulation.

**Easy to use:** Transactions can be made quickly and easily using a digital wallet.

### 4. Technology

Zero Classic is based on blockchain technology, which is a distributed and secure ledger that records transactions. Blockchain ensures the security, transparency and immutability of transactions. It also uses zk-SNARKs technology which makes your transactions invisible.

## 5. Specification

PoW algorithm: Equihash 192\_7

Developer Fee: Zero

Privacy: zk-SNARKS

Block Time: 120 Seconds

Total Supply: Infinite

Block Reward: 10 ZERC

Premine: Zero

## 6. Team

The Zero Classic team is made up of experts in blockchain, cryptography, and software development. The team has extensive experience in developing cutting-edge technologies and is passionate about the potential of blockchain to revolutionize the monetary system. The entire team works for the project voluntarily.

## 7. Roadmap

The Zero Classic team has an ambitious roadmap for the development of the currency. The roadmap includes the following steps:

Phase 1: Launch of the currency and development of the digital wallet.

Phase 2: Establishing partnerships with businesses and organizations.

Phase 3: Expansion of currency use globally.

## 8. Conclusion

Zero Classic is a promising new cryptocurrency that has the potential to revolutionize the monetary system. The currency offers a number of advantages over traditional fiat currencies, including security, privacy, decentralization and ease of use. The Zero Classic team is made up of experienced experts who have an ambitious roadmap for the development of the currency.
